KRISTIJAN IKALOVIC

GRAPHIC DESIGNER

ABOUT ME

Born in 2003. I completed secondary construction school for Architectural Technician, and then directed my professional path toward graphic design. After a period dedicated to work and personal development, in 2023 I enrolled in ITAcademy – Multimedia program. Graphic design is my primary focus, while I actively improve in web design through practice and continuous learning. By nature, I am a perfectionist, responsible toward deadlines and details, with a strong desire for learning and growth. Although I was a beginner at the start of my career, I quickly adapted to new tools and processes. I am open to constructive criticism and motivated to continuously contribute to the quality of the team and projects.
